Course outline BowTieXP

About Bowtie Methodology

Bowtie methodology is a new age risk management technique that has evolved over a period of time. With technological advancement, the need to contain “high consequence low occurrence risks” is gaining prominence. This can be effectively managed when the gap between technical possibilities and what organizations are ‘designed’ to handle are closed. A Bowtie precisely facilitates this.

- A Bowtie facilitates Structured thinking
- Capture critical information
- Manage first point of failure
- Understand and maintain barriers
- Monitoring barrier effectiveness and status
- Informed decision making
- Communication & training
- Benchmarking audit results
- Link to Management Systems & Performance Standards
- Reporting to stakeholders

BowTie methodology is extensively used in the following industry sectors

- Chemicals
- Process
- Aviation
- Oil & Gas - Offshore / Onshore
- Manufacturing
- Steel
- Construction
- Infrastructure
- Project Management
- Information Technology
- Telecommunications
- Environment
- Power
- Health / Hospitals
- Logistics
- Farming
- Water Transport
- Rail Transport
- Road Transport
- Shipping/Maritime
- Aviation
- Regulatory bodies
- Finance
- Education
- Airports
- Defence – Army / Navy / Airforce

Course Pre-requisites

Attendees are required to have a basic understanding of risk management and basic computer skills of Microsoft office.

Course Overview

- Bowtie Methodology
- Hands on Bowtie Exercises using the BowTieXP software

The course covers the core elements of bowtie development and their relationships. These elements and relationships are modelled using the BowTieXP software.

Participants will be able to model the bowtie in order to analyse the risk, evaluate the risk, treat the risk, and capture the key information within for visibility and communication.

Who should attend?

Supervisors, Managers, Engineers and personnel responsible for managing risk-based activities.

BowTieXP Software

Attendees get free access to the BowTieXP software for two months and a Certificate of Attendance.

Course Dates

15th & 16th November 2018.
